

Visualization of RNA secondary structures

Benedikt Rauscher

What the Visualization does

- Input: RNA secondary structure in dot-bracket notation.
- Output: Graph-like visualization of the structure
- Example:

Seq:	GAGUACAAUAUGUACCG
Str:	..(((.....)))..

What is it good for?

- Allows interpretation of RNA secondary structures
- Easy and quick: Just input sequences and look at the result in your browser

No installations/downloads of any kind necessary
